SUMMARY

Full-stack developer focused on Java backends, building REST APIs and web apps with Spring Boot, NestJS, Next.js and React.js. Built and deployed an internal scrum-minutes app that the team uses for its daily meetings.

SKILLS

Languages: Java, Python, C, JavaScript, TypeScript
Frontend: React.js, Next.js, HTML5, CSS3
Backend: Spring Boot, NestJS, Node.js, Express.js, REST API Development
Databases: PostgreSQL, MySQL, MongoDB, Elasticsearch
Testing and Tools: JUnit, Vitest, Git, GitHub Actions, Docker, Vercel, Postman, Prisma

EXPERIENCE

Intern (Associate Software Developer) May 2026 – Sep 2026
V-One Automation Solutions Pvt. Ltd.

- Developed REST APIs for a real-estate listing platform with NestJS, TypeScript, PostgreSQL and Prisma, using optimistic locking and idempotency keys so concurrent edits and retried requests cannot overwrite or duplicate data.
- Wrote unit and integration tests with Vitest and Supertest that run in GitHub Actions CI against a real PostgreSQL database, and packaged the API and worker as separate Docker images.
- Built and deployed MOM Pro (Next.js, PostgreSQL, Prisma, on Vercel and Neon), an internal minutes-of-meeting app the team uses daily; tasks carry forward between meetings, so members update status instead of retyping it.

Software Trainee Feb 2026 – Apr 2026
JPBP Offshore Private Limited (Restaurantware)

- Trained in full-stack development with Java, Spring Boot, TypeScript, Vue.js, SQL and Elasticsearch.
- Built a Product Catalog module as the final evaluation project, with product management screens and an Elasticsearch-backed catalog search.

PROJECTS

iHub – Idea Bidding Platform | *Spring Boot, MySQL, Elasticsearch, Next.js* GitHub | Live Demo

- Built a platform for idea creators and investors with timed auctions and live bidding, using Spring Boot REST APIs, JWT authentication and WebSocket bid updates.
- Kept MySQL as the source of truth and indexed ideas into Elasticsearch for keyword search and category filters; locked the auction row during each bid so two simultaneous bids cannot both win at the same price.
- Wrote JUnit tests for bidding, auction lifecycle and authentication that run in GitHub Actions CI, and containerised the API with Docker Compose.

Notes App | *MERN Stack (MongoDB, Express.js, React.js, Node.js)* GitHub | Live Demo

- Built a notes app with JWT authentication in httpOnly cookies, per-user data ownership, tagging and file attachments.
- Added server-side search with a MongoDB text index scoped to each user and ranking titles above content, and covered auth, ownership, validation and search with Vitest and Supertest tests.

EDUCATION

Kongu Engineering College 2022 – 2026
B.E. Computer Science and Design (Honors in Data Science) | CGPA: 8.11

Shri Vidhyabharathi Matric School 2019 – 2022
Higher Secondary and Secondary Education | HSC: 93.5% | SSLC: 98.4%

CERTIFICATIONS

- Full Stack Web Development with AI – Internshala (Apr 2024)
- Java Certification – Wipro (Oct 2025)
